

A. Outcome - by the successful completion of this course, students will demonstrate the ability to: Explain atomic structure and chemical properties of the elements based on their position in the periodic table.

A1. Define the atom

A2. Identify the names & symbols of the elements

A3. Identify the elements & compounds

A4. Calculate the atomic mass number of particles and average atomic mass number of isotopes.

A5. Explain how to use the periodic table to obtain information.

A6. Identify the composition of the periodic table.

The student will demonstrate competence:

by preparing and giving a presentation by 3 students of group that explains atomic structure and chemical properties of the elements based in their position in the periodic table.

Performance will be successful when: These are the criteria.

- The presentation includes a least one slide for each subtitle in the chapter
- Each group member will take in 5 min role in presentation part or assessment test.
- Presentation purpose is clear
- Presentation conclusion includes a summary of the main point with one.
- Perform a 5 min assessment test (can be mcq, fill in the blanks, matching or short essay questions) in the real time class.

RUBRIC:

Criteria	5	4--3	2	1 – 0
Content.	All content is integrated, related and all information is accurate.	The content is compatible with the subject, but lack of information is seen.	Incorrect or insufficient information is seen in the content.	Lack of information and false information are seen in the content
Group work	Group work was collaborative, smooth, showed cooperation among members. Members shared responsibilities, participated equally...	Some students performed their roles better than others.	Most of the students could not perform their role well.	Not everyone participated equally. Cooperation was not clearly seen...
Presentation Visual Media: -Pictures -Videos -Graphs	All slides were in the correct order and clear and comprehensive and the audience easily followed. Visual materials were used effectively.	All the slides were in the right order and the audience easily followed. But the visual materials were very few.	There were errors in the order of the slides and visual materials were missing.	There were errors in the order of the slides and there were no visual materials.
Assessment Test	All questions are integrated, related to the topic	Some questions need extra explanations.	There were some questions out of content	The assessment part is missing.
